2019 Full Line Catalog

Air Conditioning and Heat Pump Products

INVERTER

NEW PRODUCT LINE UP

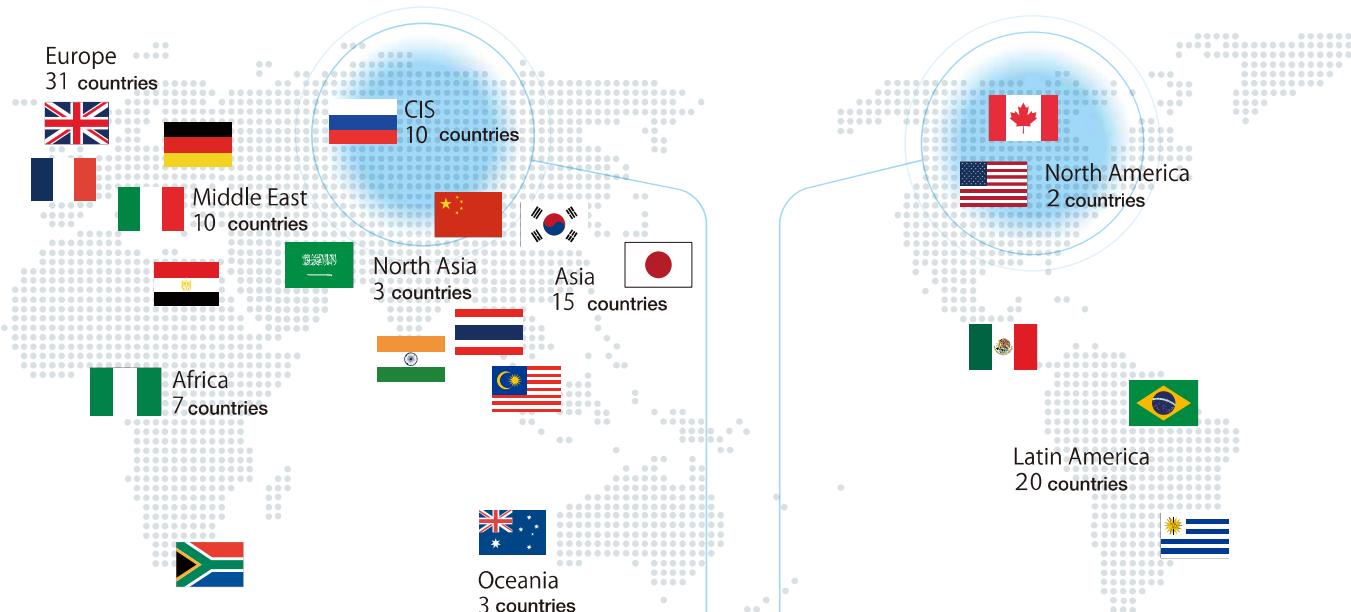

April 2019

Panasonic has produced over 100 million air conditioning and heat pump units worldwide.*

Global Brand

Our global brand serves over 100 countries in all climate zones around the world.

Our air conditioner designs consider local climate characteristics and are used in a wide range of extreme hot to extreme cold regions and countries.

Outdoor units are affected by extreme weather conditions which also affects the units performance.

In extreme cold climate and heavy snow fall conditions it is necessary to protect the outdoor unit from freezing.

Panasonic has developed special knowledge and technology for cold climate regions including Siberia and North America.

Panasonic can be characterized as a global pioneer in extreme cold climate heat pump design and installations.

* As of the end of 2014 (According to our research)

Our Evolution

Forever and ever.

	1958 Our first home cooler is launched. A window-type.
	1965 Launched indoor and outdoor separate-type.
	1969 Launched wall mounted indoor unit with outdoor unit separated.
	1972 Launched heat & cool air conditioner. Launched Heat Pump mini split making heating & cooling possible year-round.
	1981 Launched low ambient heat pump units that provide heat in extreme cold climates.
	1983 Launched inverter air conditioner.
	2008 First model equipped human sensor launched.
	2010 First model equipped ECONAVI launched.
	2014 XE series -15°F heat operation

Rugged design that continues to operate high cold climate of -15°F.

PRECISE

Precise design

Components arranged in an orderly manner are proof of high-precision and careful finishing. The compressor, which is the heart of the air conditioner, is wrapped in insulation to provide soundproofing and reduce condensation.

1 High-Efficiency Compressor

High-performance compressor with wide power output range operates accurately with less than 1 ampere for precise operation.

2 Inverter Technology

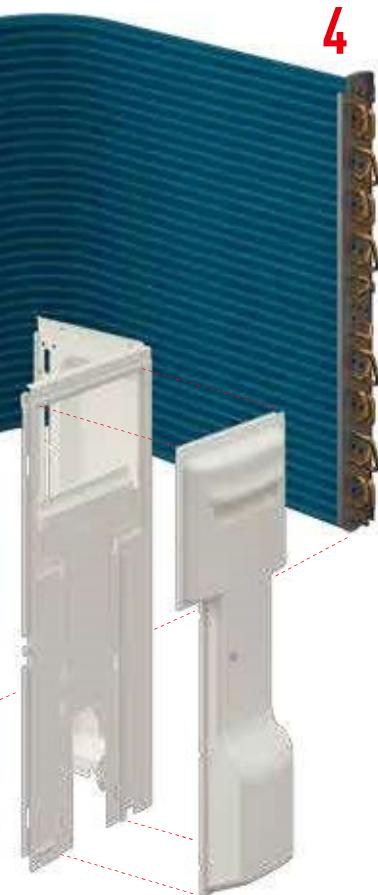

Advanced drive technology adjusts precise compressor motor rotation. During the start-up phase, the compressor quickly provides powerful, high-speed rotation; during the run phase the compressor smoothly shifts to a low speed rotation for energy savings. This maximizes compressor performance and optimizes high efficient operation.

INVERTER

Low Vibration

Anti-vibration rubber mounts on the compressor legs absorb impact and improves durability.

performance even in

3 High-Efficiency Blades

Frost on heat exchanger is frequent in cold climates. The three blade, high static pressure design moves air quietly and evenly even under harsh conditions and provides high efficiency operation.

Quiet

Smooth rotation and low vibration ensure quiet operation and durability.

Silicone Coating

The brains of the air conditioner, printed circuit board is coated with silicon to prevent malfunction from insulation deterioration.

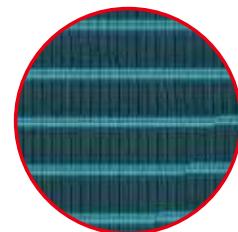

TOUGHNESS

Rugged body

4

Blue Fin Condenser

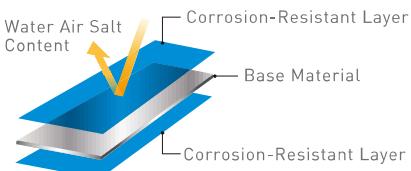

Blue Fin anti-rust coating is applied to each fin. This special coating prevents rust from salt air and moisture from rain and melting snow and assures longer life of the heat exchanger.

**Blue Fin
Condenser**

3 layer structure 3 times longer lasting

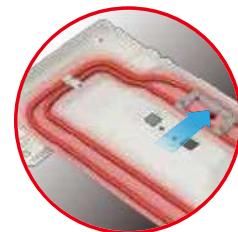

Note: According to Panasonic test results.

5

Base Pan Heater / Multiple Drain Ports

A heating element placed around the base pan prevents freezing condensate inside the outdoor unit. Multiple drain holes assist prompt drainage.

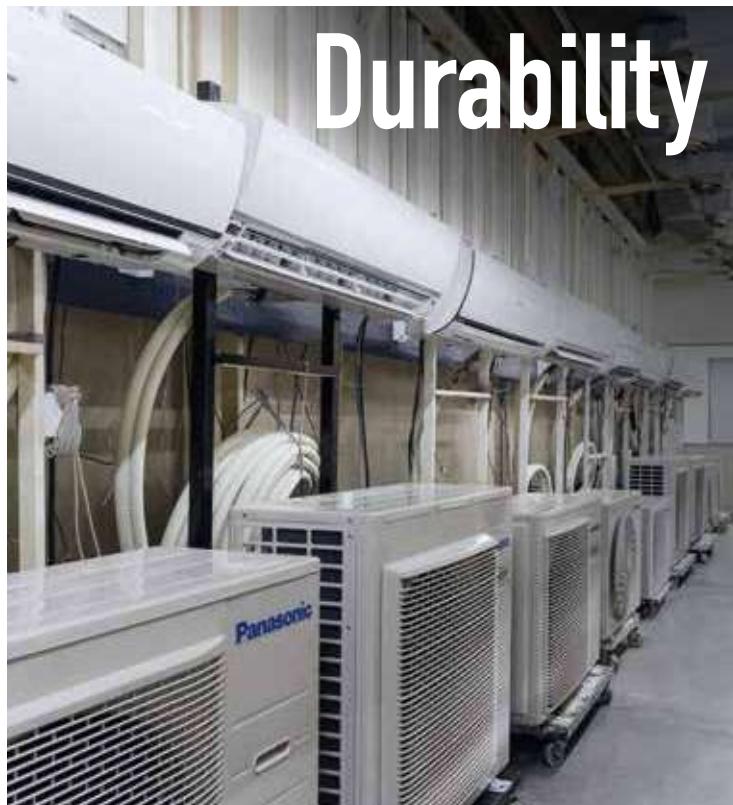

6

Powder Coated Finish

An industrial grade paint used on exterior finishes for guardrails, automobile parts provide corrosion resistance and durability.

Reliability and exceptional quality with over

Durability

A rugged design ensures that the air conditioners will continue to keep the room comfortable, and provide reliable operation for many years.

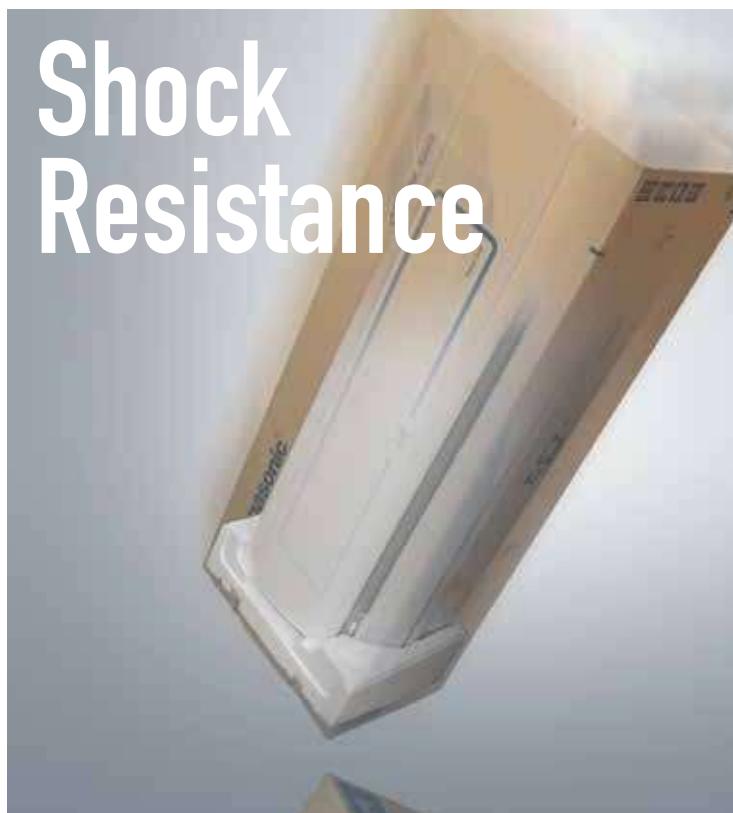

Panasonic believes this is the true value of an air conditioner and the reason we subject them to a wide range of stringent durability tests.

- Long-term Durability Test
- Compressor Reliability Test
- Operating Test in Harsh Conditions
- Waterproof Test

Panasonic conduct tests under conditions that are much more severe than actual operating conditions.

The outdoor unit is provided with IPX4 waterproof compliance. Also, an operating durability test has been conducted at a temperature up to 130°F down to -13°F in test chamber.

Shock Resistance

Panasonic simulates impacts, vibrations and other external conditions that air conditioners might receive during transportation. We assure that the quality and performance at the time of the final product inspection are maintained when the product reaches the user's home.

- Drop Test
- Vibration Test
- Warehouse Stacking Test

Even with the large impacts during transportation, the product packaging has been strengthened to prevent it from being damaged.

We place a weight on top of the test package and leave it in a room at high-temperature and humidity. After this warehouse simulation test, the product is checked for proper operation.

200 quality assurance tests.

Air conditioners should keep each person in the room comfortable without making their presence known. They should work totally in the background, using their strength to create and maintain a comfortable environment. We build this hidden strength into our air conditioners, and test them repeatedly from this viewpoint.

- Noise Test
- Environmental Test
- EMC (Electromagnetic Compatibility) Test
- Remote Control Usability Test

An actual air conditioner is operated in a test room that simulates a standard living room. The test makes it possible to confirm optimum performance level under ever-changing conditions.

A variety of tests are conducted to judge the visibility of the button colors, operating ease. The remote control is also subjected to a 1.5-meter dropping test from various angles.

Panasonic continues to offer the highest quality with the lowest possible environment impact. The fundamental principles of Panasonic products naturally apply to air conditioners. In order to live up to our reputation for quality, we work to overcome challenges and devote maximum efforts all over the world.

- Noise Test
- Environmental Test
- EMC (Electromagnetic Compatibility) Test
- Remote Control Usability Test

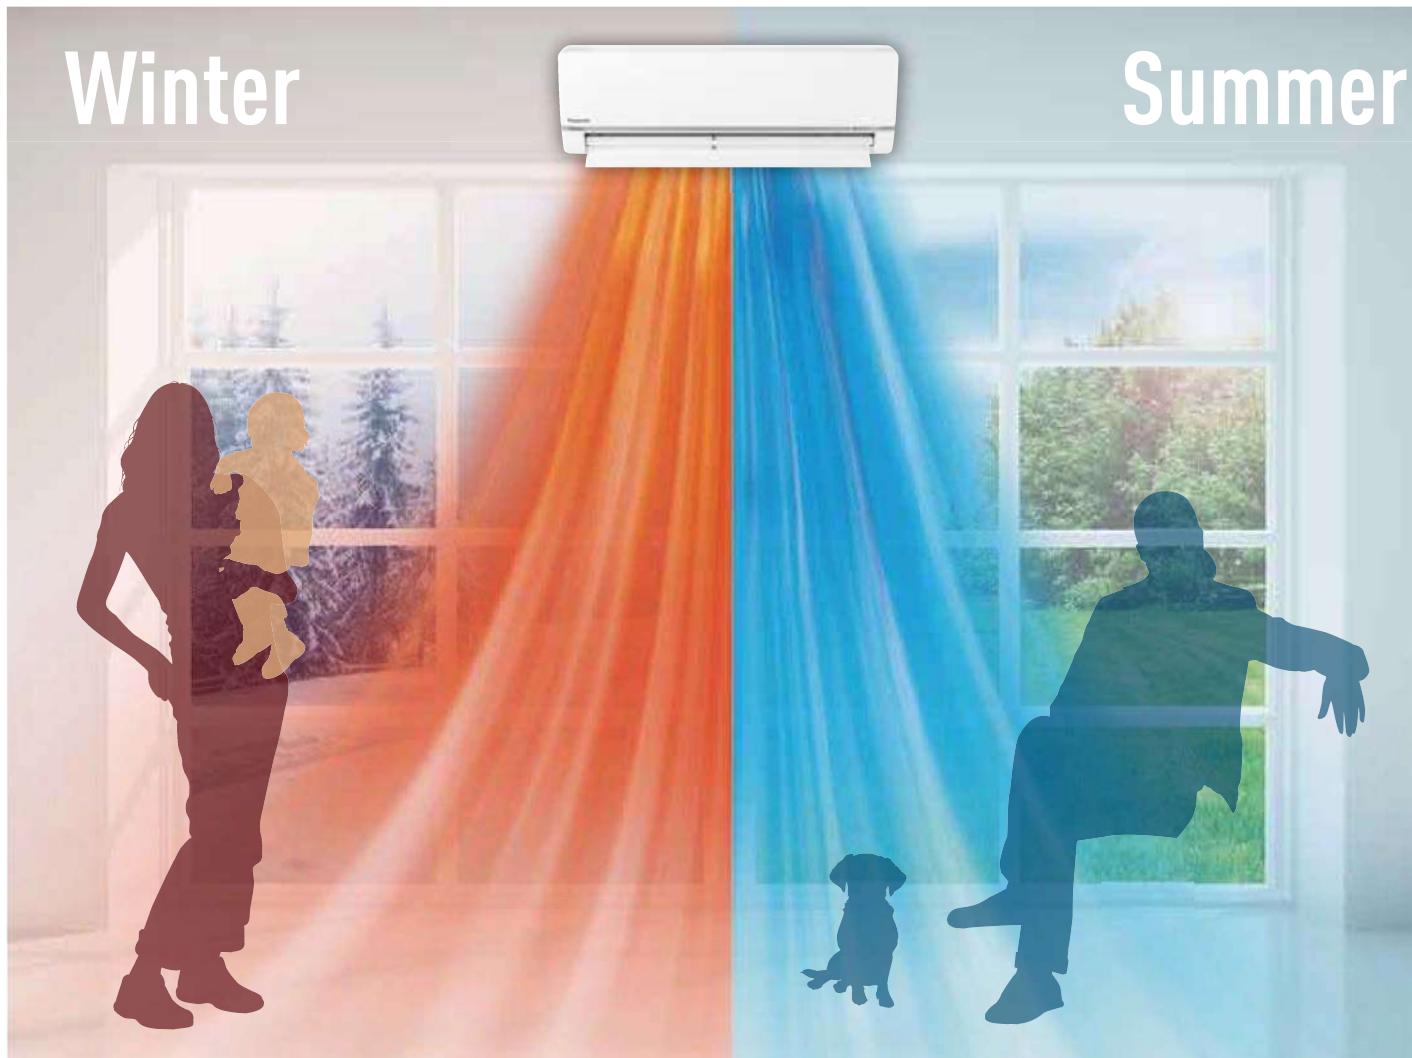

Panasonic air conditioners comply with all necessary leading industrial standards and regulations required for the market in each country.

Panasonic "eco ideas" factories reduce CO₂ emissions and conduct regional-based environmental communication activities to contribute to both the global environment and the local communities.

With Panasonic, heating and cooling are all-

Superb comfort Precise Control

Panasonic inverter technology continually adjusts its compressor rotation speed to provide maximum performance at all times. This precise operation enables quick cooling or heating while reducing power consumption compared to conventional non-inverter units.

Reduces Electricity Consumption

Panasonic inverter air conditioners/heat pumps are designed to give you exceptional energy savings while ensuring you stay comfortable at all times.

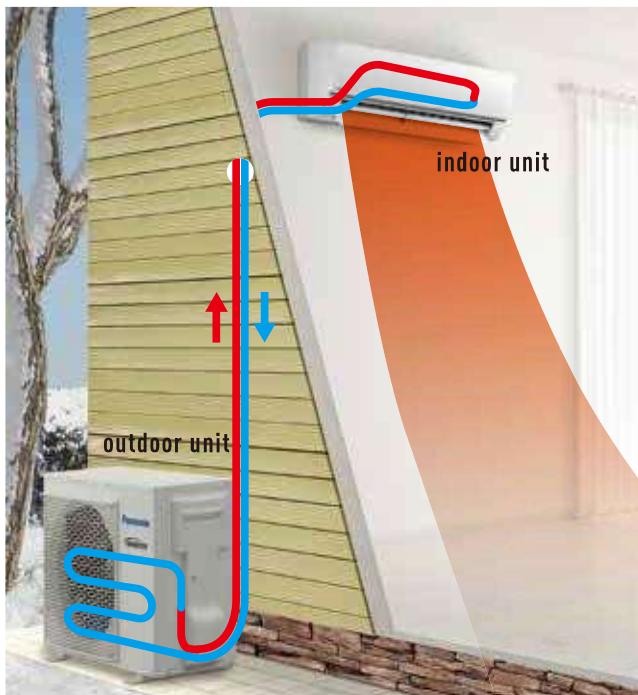

Constant Comfort

Precise temperature control with a wide power output range enables an Inverter air conditioner/heat pump to meet different room occupancy levels, providing constant comfort.

in-one providing year-round comfort.

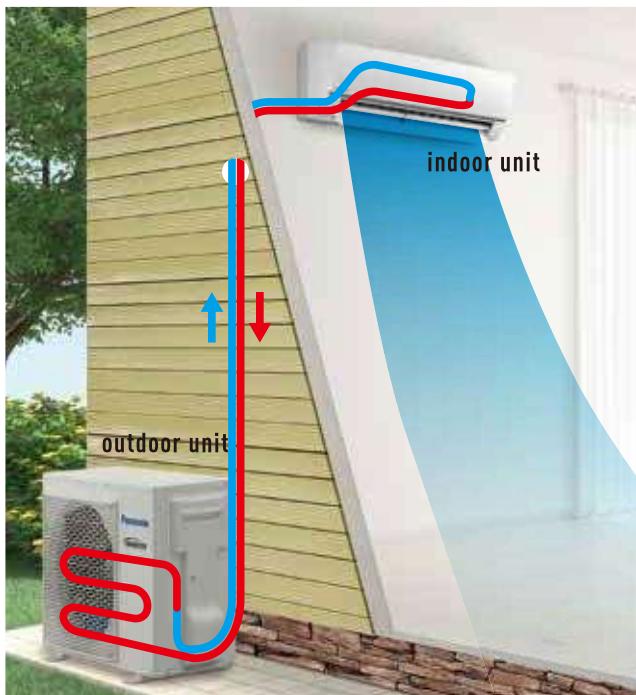

All seasons Year-round use

The air conditioning heat pump consists of a single or multiple indoor units and a single outdoor condenser unit. The indoor and outdoor units are connected by refrigerant pipes that cycle refrigerant gas between the indoor and outdoor units. The direction of the gas can be switched which changes operation between heating and cooling. This switching change is done with a simple button push on the remote controller and heating and cooling comfort is provided year-round.

At heating operation

Simply said, heat is transferred from outdoors to indoors using a compressor and high pressure, high temperature refrigerant. Cool air is drawn into the indoor unit and Warm air is released into the room. The refrigerant cycle continually repeats.

At cooling operation

Simply said, heat is transferred from indoors to outdoors using a compressor and high pressure, high temperature refrigerant in a reverse cycle from heating. Warm moist air is drawn into the indoor unit and Cool dry air is released into the room. The refrigerant cycle continually repeats.

Quick Cooling and Heating

Panasonic Inverter air conditioner/heat pump can operate with higher cooling/heating power during the start-up period to cool/heat the room faster than non-inverter models.

Whisper Quiet Operation

The indoor operating noise has been reduced by 5dB as the Inverter constantly varies its output power to enable more precise temperature control.

Optimum Performance while reducing Energy Usage

Panasonic inverter technology constantly adjusts its compressor rotation speed to provide maximum performance at all times. This precise operation enables quick cooling or heating while reducing power consumption compared to conventional non-inverter units.

Reduces Electricity Consumption

Panasonic inverter air conditioners/heat pumps are designed to give you exceptional energy savings while ensuring you stay comfortable at all times.

Constant Comfort

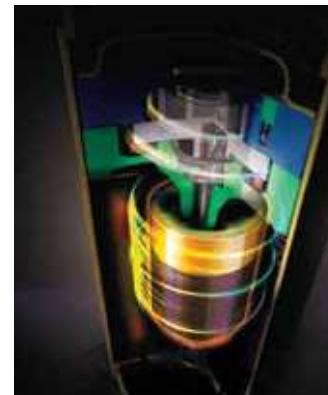

Precise temperature control with a wide power output range enables an inverter air conditioner to meet different room occupancy levels, providing constant comfort.

Quick Cooling and Heating

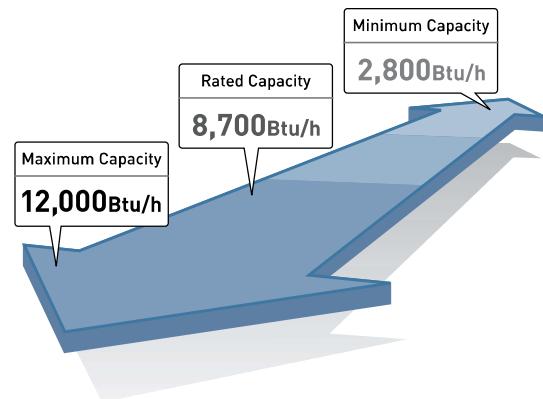

Panasonic Inverter air conditioners can operate with higher cooling/heating power during the start-up period to cool/heat the room faster than non-inverter models.

Whisper Quiet Operation

The indoor operating noise has been reduced by 5dB as the Inverter constantly varies its output power to enable more precise temperature control.

■ Wider Output Power Range

What's ECONAVI?

ECONAVI

High-precision sensor technology allows efficient, automatic operation to match room conditions. This keeps everyone comfortable while saving energy.

What does ECONAVI detect?

EXAMINE

- Level of activity.
- Human presence.

EVALUATE

- Changes in human location.
- Changes in human activity.
- Changes in human presence.

EXECUTE

- Adjusts airflow direction.
- Low activity: Auto increase set temperature.
- Absence: Auto increase set temperature.

Energy Saving and Comfort Through Sensor Technology

ECONAVI

ECONAVI 3 Sensors

1. Absence Detection Human Activity Sensor

Reduces energy usage when no activity is detected.

ECONAVI
mono sensor ECONAVI
dual sensor

Switches from high operation to reduce cooling.

2. Activity Detection Human Activity Sensor

When activity is detected, sensors start working to efficiently cool the zone.

ECONAVI
mono sensor ECONAVI
dual sensor

Switches from high to mild cooling.

3. Area Search Human Activity Sensor

Area Search is activated when activity detection is located in one side of the room vs. the other.

ECONAVI
dual sensor

Sends cool air only to areas where people are.

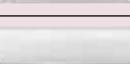

Air Conditioners and Heat Pumps Line-Up

Your Best Choice in Mini Split Air Conditioning and Heat Pump Systems

Since 1983, Panasonic Mini Split Air Conditioner and Heat Pump products offer a wide range of versatile solutions for cooling and heating requirements for single or multiple rooms. The indoor unit (evaporator) is mounted inside a room and connected to the outdoor unit (condenser) via refrigerant lines and inter-unit wiring through a 3-1/2" opening in the wall. Since no ductwork is required, installation is simple, fast and efficient. Ducted models are also available.

The indoor unit has been uniquely designed to provide whisper-quiet operation while delivering comfort throughout the room. Panasonic Mini Split Systems are stylish and provide the quality and reliability you can count on.

MULTI ZONE: RESIDENTIAL AND LIGHT COMMERCIAL APPLICATIONS

Features

ECONAVI Dual/Mono sensor

Automatic sensor for energy efficiency and comfort.
Adscence & Activity Detection, Area Search

Room Freeze Protection*

Room Freeze Protection mode helps prevent plumbing damage due to sub-Freezing Temperature. This mode automatically turns on the compressor for heat pump operation if the room temperature falls to about 46°F.

*This function may not be performed if the unit is not powered, or if the unit is unable to operate such as in protection mode. Please consult with the HVAC installers or professional for details.

Microprocessor-Controlled Operation

Microprocessor control ensures that the temperature and humidity levels in the room are always comfortable.

Wireless Remote Control

Panasonic's infrared Remote Control with and easy-to-read LCD Display, gives the user the capability to adjust & set: temperature, sweep (louver control), fan speeds, timer and more, for complete automatic operation.

Dry Mode

By coupling compressor and fan operation, intermittent operation can be precisely controlled according to room temperature, so that air is efficiently dehumidified.

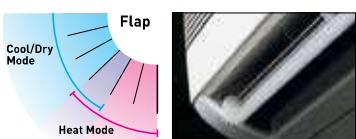

5 Fan Speeds and Automatic Fan Operation

Convenient microprocessor control automatically adjusts fan speed to High, Medium or Low. According to room temperature to maintain a comfortable airflow throughout the room.

Air Sweep Control

The air sweep function moves the louver up and down in the air outlet, directing air in a "sweeping" motion around the room and providing comfort in every corner.

Base Pan Heater

Exterios XE models include a base pan heater that prevents freezing condensate and allows very low ambient operation.

Automatic Heating and Cooling Changeover

After setting the temperature and functions you desire, just relax. If the room temperature is higher than the set temperature, cooling operation begins. If the room temperature is lower than the set temperature, heating operation begins. During normal thermostat cycle operation, cooling and heating operations automatically change in accordance with set temperature, time and room temperature (Single Zone Heat Pump unit only).

1-hour OFF Timer

When this button is pushed either while the unit is operating or while it is stopped, the unit will operate for one hour, then switch off automatically.

24-hour Clock with ON/OFF Program Timer

The remote control unit allows you to set a wide variety of timer-based operations. Such functions include automatic ON/OFF with a timer setting, same time ON/OFF every day, ON timer, OFF timer and Combination timer.

Automatic Restart Function after Power Failure

Hot Start Heating System

Right from the start, air is warm and comfortable. The Hot Start Heating System prevents any cold blasts at the beginning while the heat pump is warming up (Heat pump unit only).

Built-In Drain Pump

Max. head 20 inches from the discharge of the indoor unit. Condensation pump is only for allowing drain line to meet minimum gravity flow requirements.

Low Ambient

Low Ambient heating operation models range from 5°F to -15°F

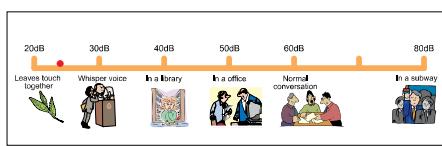

Electric Refrigerant Control Valve

The circulation volume of the refrigerant is controlled by a pulse type electric control valve. In order to attain optimum efficiency, when the power is switched ON, the opening degree of the electric control valve is controlled between 90 and 480 steps.

Quiet Mode

LOW, low fan speed for extra quiet operation.

Filter Sign

Filter sign informs you when filter maintenance is necessary.

XE/E series with CZ-RDC516C-1

Self-Diagnosing Function

Units are equipped with Self-Diagnosing Function (methods are difference depending on the models). This makes it easier to diagnose malfunctions, greatly reducing service labor (Wired remote controller).

(Example of CZ-RTC2)

Anti-Microbial Filter

Anti-microbial Filter by 3M. This filter is treated to inhibit the growth of mold and mildew, and helps create clean air.

Test Comparison

	Microbial Growth Rating	
	7 days	28days
Anti-microbialFilter	No growth	No growth
Normal Filter Paper	60% growth	60% growth

*Tested per ASTM G21-96

Blue Fin Condenser

Condensers can take a beating from exposure to salty air, rain and other corrosive factors. Panasonic has extended the life of its condensers with an original anti-rust coating. Tested for 2,000 salt spray hours.

The latest breakthrough in energy efficiency and high performance.

Powerful Heating at Low Ambient Temperatures

Operational heat capacity down to -15°F provides heating in extreme cold climate regions.

Prevent Freezing Maintain Efficiency

Base Pan Heater is included with XE models and operates during defrost cycle to prevent frozen condensate. Multiple drain holes to prevent frozen condensate build up.

Room Freeze Protection

Prevents plumbing damage due to sub-freezing temperatures. Automatically turns on compressor for heat pump operation if the room temperature falls below 46°F .

High Energy Efficiency up to 30.6 SEER, 14.0 HSPF

XE series are among the highest cooling and heating efficient models in the industry. Thanks to this exceptional performance, you will enjoy even more comfort and cost savings.

Automatically Sense Room Condition and Optimize Operation

ECONAVI's Intelligent Dual Sensor monitors absence, activity level and activity location to direct energy-efficient conditioned air for ultimate comfort.

Inverter Technology

Panasonic inverter technology provides optimum power control and extremely efficient operation by modulating the compressor capacity. The result is efficient and flexible operation using less electricity.

Application Example

The ceiling-mounted unit is equipped with a highly efficient, multi-blade centrifugal fan that generates a powerful, yet gentle airflow throughout the room. A redesigned aerodynamically tested louver structure minimizes operational sound even at high fan speed.

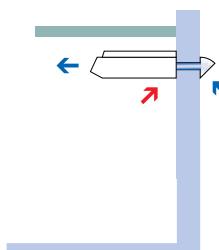

Auto-Louver Function Provides Airflow During Heating or Cooling Operation.

Auto-louver function is a standard feature which provides optimum airflow during heating or cooling operation. Angle of louver is automatically set for heating or cooling. For example, when heating with fan speed set to low, the discharge is aimed downward so that warm air reaches the floor. The louver angle can be set to between 4°F above and 80°F below the horizontal in five steps. An auto-sweep function to distribute the airflow over a wide area is also provided. Wind direction is adjusted automatically in both heating and cooling operation. The louver can also be set to swing automatically from F1 to F5 in any operation mode (heat pump type only).

Fresh Air Intake Capability and Duct Extension

Ceiling-suspended models have the capability of bringing fresh air from outside using an air-intake duct (field supplied).

4-Way Airflow Design Sends Cool Air in All Directions

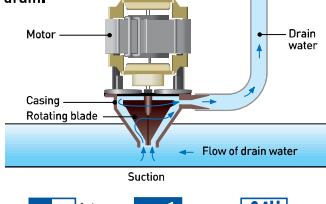

Air is returned through the center of the grille, while evenly distributing air through each of the 4 supply air openings.

Installation in the center of the room provides for the greatest comfort. However, 1 or 2 supply louvers can be closed for installation near 1 wall to provide 3 or 2 way airflow. Also, by closing off 1 supply louver,

Integrated Drain Pump

Drain pump is built into the unit to raise the condensate water up to 20" from the drain pump discharge to a gravity drain.

Whisper-Quiet Operation

Thanks to the newly developed turbo fan and decreased resistance of the air path, one of the industry's lowest levels of noise has been achieved.

Slim Duct Heat Pumps

Min/Max capacity 15,300 - 30,600 Btu/hr.

2-5 Zones (3 Ton) CU-5E36QBU-5

Cooling Capacity: 36,000 (9,900 - 39,000) Btu/hr.
Heating Capacity: 37,800 (11,600 - 49,500) Btu/hr.
SEER Non-Ducted 18.5 / Ducted 16.5
EER Non-Ducted 9.6 / Ducted 8.3
HSPF Non-Ducted 10.0 / Ducted 9.5
Min/Max capacity 15,300 - 59,500 Btu/hr.

All multi split condensors must have minimum two indoor units installed.

Multi-Zone Systems

Advantages of Multi-Zone Inverter System

- Year-round comfort with Multi Zone Heating & Cooling.
- Combine low-energy Inverter Technology and Ductless Zone Control for optimum energy efficiency.
- Cool and Heat 2-5 rooms or a whole house with one outdoor condenser and up to 5 ductless indoor units.
- Eliminate cost of duct installation and cleaning.

Multi Zone Combination Charts

Understanding total System Capacity is an important step in sizing and selecting heat pump equipment.

Outdoor Unit Capacity: The **System Capacity** is the Cooling and Heating Capacity listed at the top of each Outdoor unit's specification chart.

Indoor Unit Demand: The Cooling and Heating Capacities are listed at the top of the specification chart of each Indoor Unit (see page 30). The total of these partial indoor capacities is the **System Demand**.

Multi Zone Combination Charts

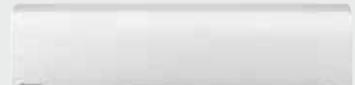

Now let's understand the term **Diversity**. Diversity is when the load in the conditioned space is not constant. For example the east side of a house has more direct sun and cooling load requirement in the morning and the west side has more direct sun and cooling load requirement in the afternoon.

A system sizing calculation that plans for diversity may size up to approximately 130% of indoor unit demand versus the outdoor unit's system capacity provided that planned operating demand throughout the day never exceeds 100% of system capacity. If there is no planned Diversity then the indoor unit demand should not exceed 100% of the outdoor unit capacity.

Therefore, a first step in sizing and selecting any multi-zone system is to understand the System Demand that the building requires before moving on to selecting Indoor unit combinations.

Remote Controllers – Residential and Light Commercial (PAC)

Series	Wireless	Wired
S26PK2U6	 (Included)	 Option A: *CZ-RTC5A High Spec Control With filter countdown For Title 24, ECONAVI Ready
S26PT2U6 S36PT2U6 S42PT2U6	 CZ-RWST2U Controller with Receiver (Option)	 Option B: CZ-RTC4 Timer Control ECOVAVI Ready
S26PF2U6 S36PF2U6	 CZ-RWSK1U Controller CZ-RWSC3 Receiver (Option)	 CZ-CENSC1 ECONAVI Sensor (Option)
S26PU2U6 S36PU2U6 S42PU2U6	 CZ-RWSU3U Controller with Receiver (Option)	 Option C: CZ-RE2C2 with on/off, temp and mode control

*High-Spec Wired Remote Controller, Stylish, Easy to Use and ECONAVI Ready

Multiple Control Setting Functions for More Energy Savings

Temperature Auto Run: Even if you change the temperature setting, it automatically returns to the original setting after a set time. You can set temperature auto return time in 10-minute intervals within a 4-hour period.

Temperature Setting Range: Both Max. and Min. temperature settings can be limited. Doing this helps reduce power consumption due to over cooling or heating. Setting is possible in the Cooling, Heating and Dry modes.

Auto Shutoff: Air conditioning operation can be programmed to stop its operation automatically after a set time, so you don't have to worry about forgetting to switch the unit off. Even if you manually switch the unit back on after it has stopped, the program will continue to activate and continue to switch off the operation after a set time.

Menu items

- Basic instructions
- FLAP
- Individual louver control (Lock individual flap only for 4-way cassette MU type)
- ON/OFF timer
- Weekly timer

- Filter information
- Outing function
- Quiet operation mode

- Initial settings
- Ventilation

Energy Saving

- Temperature auto return
- Temperature setting range
- Auto shutoff
- Schedule peak cut
- Repeat off timer
- ECONAVI on/off

Maintenance Function

- Outdoor unit error data
- Service Contact address
- RC setting mode
- Test Run
- Sensor Information
- Service check
- Simple/ Detailed Settings
- Auto address

Wireless Home – Internet Connect

Internet Connect devices remotely control a system with one or more indoor units via the cloud. An Internet Control adaptor is required for every indoor unit. Requires an internet connection and a Wi-Fi router. Control your equipment using any web browser, iOS or Android device.

	USPA-AC-WIFI-1B RAC Residential Wired Wi-Fi Adaptor For compatible units, this Internet Control device is mounted next to the indoor unit and connects to the main board with the supplied cable. It can be used with wired and wireless remotes.
	USPA-RC2-WIFI-1 PAC Residential & Light Commercial Wired Wi-Fi Adaptor This Internet Control device can be paired with a wired or wireless remote and uses the instructed remote wiring. A wired or wireless remote is not necessary and makes a great Lead/Lag control solution.
	USIS-IR-WIFI-1 RAC & PAC Residential and Light Commercial Wireless Adaptor This universal Internet Control infrared (IR) hub can control any RAC or PAC indoor unit with the factory wireless remote or optional wireless kit. It can be used on a table top or wall mount to send IR signals to the unit.
<p>All Internet Control features are included for free up to 50 indoor units. The Pro License is required to control 51 or more indoor units.</p> <ul style="list-style-type: none">• On/Off• Heat, Cool, Dry and Auto Modes• Set Point Temperature• Adjust Fan Speed• Louver Direction (if applicable)• Ambient Temperate• AC Unit Error Signals, Codes ad Descriptions• Multi-lingual Interface• Automatic Firmware Updates• Allows Multiple Users• Annual Schedule Up to 10 Timers and Scenes• Multiple Home/Zone Management• Powerful and Energy Savings Models• Advanced User Functions• AC Unit Error Signals, Codes and Descriptions• Error E-mail Notifications• User Defined Alerts	

Note: Not all features are available on all indoor models

Wireless Home App – Internet Connect

Control your home's comfort with the smart Internet Control device via smartphones, tablet and PC and via the internet.

Offering the same functions as if you were at home or office: start/stop, mode operation, set temperature, room temperature etc. As well as the new, advanced functionality provided by internet control to achieve the best comfort and efficiency with the lowest energy consumption.

What's Internet Control?

Internet Control is a next generation system providing a user-friendly remote control of air conditioning or heat pump units from everywhere, using a simple Android or iOS smartphone, tablet or PC via web browser.

Simple Installation

Just connect the Internet Control device to the air conditioner or heat pump with the supplied wire and then link it to your WiFi access point.

Internet Control. Easy to install. Maximum benefit

Internet Control is underlined with the slogan “Your Home in the Cloud”, meaning a simple and easy to handle solution has been considered for every user to manage the device, not requiring any communication or computer skills.

No servers. No adaptors. No wires. Just a small box is needed to be connected and placed close to the air conditioning indoor unit and your smartphone, tablet or PC.

Your existing WiFi connection does the rest when you are at home. Start the App from your smartphone device, your tablet or your computer, and enjoy a new experience in comfort. And if you are out of town, just launch the App, and manage the air conditioning of your home from the cloud.

An intuitive and user-friendly interface that lets you manage your air conditioning unit in the same way you do with the remote controller at home. Internet control can be downloaded in from the **AppStore** or **PlayStore**.

BACnet Integration

<p>BACnet IP and MSTP Controller. Requires (1) device per indoor unit.</p>		
	USPA-AC-BAC-1	<p>RAC Residential BACnet Controller This is a BACnet over IP or MSTP device. Configured using external dip switches. Includes an HTML based interface that can be used for additional control and BACnet network settings.</p>
	USPA-RC2-BAC-1	<p>PAC Residential & Light Commercial BACnet Controller This is a BACnet over IP or MSTP device capable of monitoring and controlling all generations of PACi, ECOi and ECOi EX units. Configured using external dip switches. Includes an HTML based interface that can be used for additional control and BACnet network settings.</p>
	USPA-AC-BAC-128	<p>PAC Residential & Light Commercial BACnet Controller This is a BACnet over IP server device capable of monitoring and controlling PACi, ECOi and ECOi EX systems. Up to 128 indoor units and 10 refrigerant circuits can be integrated (up to 30 PACi systems). Auto-Discover feature detects connected Panasonic equipment for easy setup and integration. Setup and control via Ethernet port to access GUI.</p>
	CZ-CFUNC1U	<p>USPA-AC-BAC-128 controller requires (1) Communication Adaptor (CZ-CFUNC1U)</p>
<p>The USPA-AC-BAC-1, USPA-RC2-BAC-1 and USPA-AC-BAC-128 all feature occupied/unoccupied heat and cool set points for reduced programming time and greater energy efficiency.</p>		
<p>Global and Individual Operation/Setting Objects</p> <ul style="list-style-type: none"> • All On/Off • On/Off • Mode • Setpoint • Fan Speed • Air Direction (n/a for ducted units) • Filter Sign Reset • Prohibit Thermostat Functions • Occupied/Unoccupied All • Occupied/Unoccupied Cool Setpoints • Occupied/Unoccupied Heat Setpoints • Run Time Consumption Reset • ECONAVI-Human detection (if available) 	<p>Global and Individual Monitor/Status Objects</p> <ul style="list-style-type: none"> • On/Off • Mode • Setpoint • Fan Speed • Air Direction (n/a for ducted units) • Space Temperature • Prohibit Thermostat Functions • Filter Sign Reset • Unit and System Error Codes • CZ-CFUNC1U Error Codes (BAC-128) • Occupied/Unoccupied Mode • Today, Yesterday and Total Run Time Consumption 	

Note: Not all features are available on all indoor models

LonWorks Integration

	CZ-CLNC1U	The CZ-CLNC1U LonWorks Interface can control up to 16 indoor units. Monitors and controls all generations of PACi, ECOi and ECOi EX systems. Connecte directly into the communication bus and is field-configured via dip switches.
---	------------------	---

The CZ-CLNC1U offers the following setting and monitoring objects. Some Objects are not available on all indoor models.

Indoor Unit Operation/Setting Objects

- On/Off
- Mode
- Setpoint
- Fan Speed
- Air Direction (n/a for Ducted Units)

Indoor Unit Monitor/Status Objects

- On/Off
- Mode
- Setpoint
- Fan Speed
- Air Direction
- Space Temperature
- Unit and System Error Codes

RAC Connectivity to PACi, ECOi and ECOi EX

	CZ-CAPRA1	This adaptor serves and an interface required to connect a central control device, such as an intelligent controller, with the a room air conditioner. Using this adaptor can operate or monitor the room air conditioner from a central control device. Panasonic room air conditioners equipped with the CN-CNT terminal are supported.
---	------------------	---

Features: The following operations from the central control device can be performed

- Operations to start/stop the room AC, switch to operation mode, and set the temperature, fan speed and fan direction (up/down).
- Monitor the operation status and abnormality of room air conditioner.
- Prohibiting the remote control operation of room air conditioner
- Using On/Off contact of external connection can start/stop the room air conditioner, prohibit/permit the remote control operation, and perform emergency stop. A coin timer or card key can also be contacted.
- Retrieving the operation signal of abnormal signal of room air conditioner. (An external power source (DC12V) is separately required.)

Controllers, Communication and Integration

Model No.	Description	Use With
RAC Wired Controllers		
CZ-RD516C-1	Wired Remote (for Wall Mount)	XE9SKUA, XE12SKUA, XE15SKUA E9RKUA, E12RKUA, E18RKUA, E24RKUA E9NKUA, E12NKUA, E18NKUA, E24NKUA,
CZ-RD52CU	Wired Remote Controller (4-Way Ceiling Recessed)	4-Way Ceiling Recessed: E**RB4U
CZ-RD52DU	Wired Remote Controller (4-Way Ceiling Recessed)	Slim Duct: E**SD3UA
KE & KS Wired Controllers		
CZ-RD515U	Wired Controller	All KE, KS and MKE Models
CZ-RC515UA	Wire Harness (required with CZ-RD515U)	PCB Wire Kit for CZ-RD515U. Required for use with KE, KS 30 & 36 Models
PAC Wireless Controllers		
CZ-RWSK1U	Wireless Controller	Concealed Duct: S-26/36PF1U6, S-26/36/42PF2U6 (Included with Wall S-26PK2U6)
CZ-RWSC3	Receiver (Controller & Receiver ordered separately)	Concealed Duct: S-26/36PF1U6, S-26/36/42PF2U6
CZ-RWSU3U	Wireless Controller	4-Way Ceiling Recessed: S-26/36/42PU2U6 (for *2U6 models)
CZ-RWST2U	Wireless Controller	Ceiling Suspended: S-26/36/42PT2U6 (for *2U6 models)
PAC Wired Controllers		
CZ-RTC5A*	Wired High-Spec Remote	Wall Mount : 26PK1U6 26PK2U6 4-Way Ceiling Cassette : 26/36/42PU1U6 26/36/42PU2U6 Suspended : 26/36/42PT1U6 26/36/42PT2U6 Concealed Duct Duct : 26/36PF1U, 26/36PF2U6
CZ-RTC4*	Wired Programmable Timer Remote	
CZ-CENSC1*	ECONAVI Sensor (*Optional with CZ-RTC5 or CZ-RTC4)	
CZ-RE2C2	Wired Simplified Remote	
CZ-64ESMC2U	Wired System Controller	
Interface Controls		
USPA-AC-WIFI-1B	WIFI Interface for RAC (XE models, E9/E12NKUAW)	XE models, E9/12NKUAW, S9/12NKUA, ME7RKUA, E**RKUAW, E12/18RB4UW
USPA-RC2-WIFI-1	WIFI Interface for PAC & ECOi	All 26,000 ~ 42,000 BTU/h Models, except KS30/36NKU and KE 30/36NKU
USIS-IR-WIFI-1	WIFI Interface for RAC	S18/24NKUA, E18/24NKUA, S9/12NKUW-1, S18/22NKU-1, KS12NB41, KS18NB4UW, MKS**NKU, MKS**NB4U, MKE**NKU, MKE**NB4U, KE18NB4UW, KS30/36NKU, KE30/36NKU
USPA-AC-BAC-1	BACnet Interface for RAC (XE / E**NKUA Series)	All XE, E9/12NKUA, S9/12NKUA, ME7RKUA, E**RKUAW, E12/18RB4UW
USPA-RC2-BAC-1	BACnet Interface for PAC & ECOi	All 26,000 ~ 42,000 BTU/h Models, except KS30/36NKU and KE30/36NKU
